

Project title: Pheha Plastic

Date: 10/10/2021

Project team members: Ravanpreet Kaur, Tlotliso Namane, Lehlohonolo Thakhisi

Description:

The website's main function is to target awareness in recycling plastic and reuse it to create useful products. The flowchart above shows how the website is designed and the home page contains the navigation bar of every section, clicking on them directs you to a different section scrolling through the website.

Home page: The section shows a slide about plastic recycling and different features of images in the background and a navigation bar of different sections in the website and the company logo as well. Each section is accessible either clicking on the bar or scrolling willingly.

About section: The about tells the viewer about Pheha Plastic and its establishment, creating loads of different products from recycled plastic turning them into beautiful masterpieces. This

section can easily be accessible by clicking on the navigation bar.c

Services section: This section shows the viewers what Pheha Plastic can do and what they can create with recycled plastic and the photos provided are in black and white but hover over them and they zoom in giving out their natural colours and the name of the product below will show a bottom border. The images also move by dragging your curser on the images moving them either from the left or right and as they move shadows follow them.

WHAT WE CAN DO

These are just some of the recent experiments we have made using our Injection machine: these products are made by injecting hot plastic into aluminium molds. We are still experimenting with the Extruder machine to create a production line of baskets, bowls, lamps and jewellery.

Mission section: The section tells the viewer what their mission is by creating a better world where plastic can recycled and reused thereby reducing it making the world green. The mission section shows images that explain different missions and when the viewer hovers over them the images as well as the content zooms in and the content is 1px larger. The section reappears by rotating and being visible to the viewer.

MISSION

To create a greener Lesotho through plastic recycling

Sanitation
- Clean up the environment
(creating more beautiful communities)

Recycling
- Divert plastic from becoming trash and polluting the environment

Awareness
- Engage community members in environmental action through awareness campaigns, clean-ups and work-shops

Waste Management
- Provide sustainable plastic waste management options for households and businesses.

Waste Management
- Provide sustainable plastic waste management options for households and businesses.

Vision section: The vision section tells the viewers their aim to provide economic boost to the community as the image shows a hand boosting the world to greater heights and establishing programs for students and the community to undertake and volunteering in plastic recycling in exchange for credit, tokens and vouchers. This section reappears from the right when approached.

Opportunity section: The section tells the viewer about programs to undertake, opportunities for people to join in and help make the world greener and the image provided shows the community taking part in the program by recycling plastic in the required bin. This section reappears from the left when approached.

Contact section: The footer contains the contacts information and social media platform links for viewers to get in touch and the email and phone are provided in shadowed boxes that zoom out when the viewer hovers and the social media platform icons contains links that will direct the viewer to the page or account of Pheha Plastic. The icons change color when the viewer hovers over them as well.
